

SONU Enhances Surgical Recovery

- **Wearable Headband**
Lightweight, comfortable, fast-acting and easy-to-use
- **Drug-Free Therapy**
Uses sound-based technology (not medication) to provide natural relief from nasal congestion
- **Personalized Therapy**
Sound waves tuned to your anatomy to maximize effectiveness
- **FDA-Approved**
Proven safe and effective through clinical testing and regulatory approval
- **Better Sleep & Focus**
Improved nasal breathing can lead to better sleep quality, energy, and concentration

SONU app requires iPhone 10 or newer (with Face ID) or Android 10 (Android 13+ recommended)

Enhance Recovery. Improve Outcomes.

Support surgical healing and long-term nasal wellness with the **FDA Approved SONU™ Band** - a wearable, non-drug therapy now eligible for **Remote Therapeutic Monitoring (RTM)** reimbursement.

✓ FDA Approved ✓ RTM CPT Codes ✓ Non-Pharmacological

Monitor Post-Procedure Healing

The **SONU™ Band** delivers targeted acoustic resonance therapy to promote nasal breathing and symptom relief.

SONU is a non-invasive option that helps providers extend post-procedure care.

SONU qualifies for **RTM coding and reimbursement**.

Pre-Procedural Use

- Reduces congestion prior to procedure (e.g., cryotherapy, turbinate reduction, balloon sinuplasty)
- Enhances steroid-free pre-op preparation

Post-Procedural Use

- Sustains airway patency and comfort as tissue heal
- Decreases reliance on decongestants or steroids
- Improves compliance with in-app daily reminders

Long-Term Care

- For chronic rhinitis or sinusitis management
- Reinforces daily nasal airflow with or without medication

Use SONU in Combination with Procedures

| Procedure | SONU Benefits |
|---------------------------------------|---|
| Septoplasty | Maintains patency during tissue recovery |
| Cryotherapy | Complements nerve treatments, eases healing |
| RFA (Radiofrequency Ablation) | Promotes nasal airflow without sprays or medication |
| Inferior Turbinate Reduction | Supports healing and airflow consistency |
| ESS (Endoscopic Sinus Surgery) | Enhances nasal breathing with or without pharmacologics |
| Nasal Valve Repair | Enhances nasal airflow without applying pressure |
| Balloon Sinuplasty | Keeps sinus pathways open post-procedure |
| Sleep/Airway Surgeries | Promotes nasal breathing post surgery |
